

CONTENTS

PREFACE	9
I. INTRODUCTION	13
Continuity and novelty: the early phase of modern philosophy in its relation to mediaeval and Renaissance thought—Continental rationalism: its nature, its relation to scepticism and to neo-Stoicism, its development—British empiricism: its nature and its development—The seventeenth century—The eighteenth century—Political philosophy—The rise of the philosophy of history—Immanuel Kant.	
II. DESCARTES (1)	74
Life and works—Descartes' aim—His idea of method—The theory of innate ideas—Methodic doubt.	
III. DESCARTES (2)	100
<i>Cogito, ergo sum</i> —Thinking and the thinker—The criterion of truth—The existence of God—The accusation of a vicious circle—The explanation of error—The certainty of mathematics—The ontological argument for God's existence.	
IV. DESCARTES (3)	125
The existence of bodies—Substances and their principal attributes—The relation between mind and body.	
V. DESCARTES (4)	133
The qualities of bodies—Descartes and the dogma of transubstantiation—Space and place—Motion—Duration and time—The origin of motion—The laws of motion—The divine activity in the world—Living bodies.	

- VI. DESCARTES (5) 147
 Man's awareness of freedom—Freedom and God—Provisional ethics and moral science—The passions and their control—The nature of the good—Comments on Descartes' ethical ideas—General remarks about Descartes.
- VII. PASCAL 161
 Life and spirit of Pascal—The geometrical method, its scope and limits—'The heart'—Pascal's method in apologetics—The wretchedness and the greatness of man—The wager-argument—Pascal as a philosopher.
- VIII. CARTESIANISM 181
 The spread of Cartesianism—Geulincx and the problem of interaction.
- IX. MALEBRANCHE 187
 Life and writings—The senses, the imagination, the understanding; avoidance of error and attainment of truth—God as the only true cause—Human liberty—The vision of eternal truths in God—Empirical knowledge of the soul—Knowledge of other minds and of the existence of bodies—God's existence and attributes—Malebranche in relation to Spinoza, Descartes and Berkeley—The influence of Malebranche.
- X. SPINOZA (1) 211
 Life—Works—The geometrical method—The influence of other philosophies on Spinoza's thought—Interpretations of Spinoza's philosophy.
- XI. SPINOZA (2) 220
 Substance and its attributes—Infinite modes—The production of finite modes—Mind and body—The elimination of final causality.
- XII. SPINOZA (3) 236
 Spinoza's levels or degrees of knowledge—Confused experience; universal ideas; falsity—Scientific knowledge—Intuitive knowledge.
- XIII. SPINOZA (4) 244
 Spinoza's intention in his account of human emotions and conduct—The *conatus*; pleasure and pain—The derived emotions—Passive and active emotions—Servi-

tude and freedom—The intellectual love of God—The 'eternity' of the human mind—An inconsistency in Spinoza's ethics.

XIV.	SPINOZA (5)	258
	Natural right—The foundation of political society—Sovereignty and government—Relations between States—Freedom and toleration—Spinoza's influence and different estimates of his philosophy.	
XV.	LEIBNIZ (1)	270
	Life—The <i>De arte combinatoria</i> and the idea of harmony—Writings—Different interpretations of Leibniz's thought.	
XVI.	LEIBNIZ (2)	279
	The distinction between truths of reason and truths of fact—Truths of reason or necessary propositions—Truths of fact or contingent propositions—The principle of perfection—Substance—The identity of indiscernibles—The law of continuity—The 'panlogism' of Leibniz.	
XVII.	LEIBNIZ (3)	300
	Simple substances or monads—Entelechies and prime matter—Extension—Body and corporeal substance—Space and time—The pre-established harmony—Perception and appetite—Soul and body—Innate ideas.	
XVIII.	LEIBNIZ (4)	324
	The ontological argument—The argument to God's existence from eternal truths—The argument from truths of fact—The argument from the pre-established harmony—The problem of evil—Progress and history.
